Yes, the proposed bonding amount looks good and SITLA concurs.

Hi Andy,

In preparation for the permit transfer from Todd Truman to Terry Larsen, adequate reclamation surety needs to be posted by Mr. Larsen. I think you're familiar with our average cost per acre bonding amounts. The attached bond amount information was presented to the Utah Board of Oil, Gas & Mining in March for their approval. They have verbally approved it, and I think we are awaiting their formal approval.

Please also see the attached operation map from Mr. Larsen, which shows existing and proposed disturbance.

Can you concur with a reclamation surety amount of \$36,900 for the total 6 acres?

If you see any problems or have concerns, feel free to discuss. I'm comfortable that this amount would be adequate for the disturbance as proposed.

Thanks.

Peter
